

Para Triathlon Pathway

| High Performance Sport

All Para athletes should begin by connecting with Para Sport Organizations within their community, as this will provide a strong foundation for competition in any Para Sport.

Entering the high performance Para Triathlon world is dependent on previous sport experience. Triathlon Canada seeks to recruit athletes with high performance sport backgrounds into the Paralympic pathway. If you are a Paralympian in another sport or have competed as an elite athlete we want to meet you!

The first point of entry for the Para Triathlon pathway is completion of an intake form. This form is used to collect basic information to determine the best route forward for any athlete looking to join the program. An ITU Medical Diagnostic Form is also required for all high performance athletes.

Classification is only required once an athlete has been identified for High Performance competition. This is done at an International Triathlon Union (ITU) event.

All required forms are available on the Triathlon Canada website - [click here](#)
